NRS 214 - Peer Reviewed Articles/Articles authored by a Nurse
January 21, 2019

1. The Peer Review Process:

- Peer reviewed or scholarly journals contain peer-reviewed articles and other content that is subject to a process of evaluation by other experts in the field to ensure the research is academically sound. Peer reviewed work is shared with researchers and

2. Evaluation:

- Peer-reviewed articles are sometimes referred to as "refereed" articles.
- Use your search to identify Peer-Reviewed Articles.
- Check the journal near the table of contents that states the peer review process or article in Canada.
- Check the journal for editorial information (look for an "about" or "editorial" page).
- Check the journal for editorial information (look for an "about" or "editorial" page).

3. Statistics: Nursing Introduction Research: Guide (Web Resource)

- Check Canadian medical journal information.

4. Other Resources:

- Check Canadian medical journal information.
- Check Canadian medical journal information.
- Check Canadian medical journal information.
- Check Canadian medical journal information.

Books and eBooks Magazines Scholarly Journals Trade Publications Newspapers Websites Test your Knowledge

Books and eBooks

- A book and its digital counterpart the ebook contain the same content. Almost all books are born digital and then printed onto paper afterwards
- Cover a wide range of topics, and present both non-fiction (fact) and fictional information
- Can be written by a single person, or present a series of essays or chapters written by numerous people
- When conducting research, books can help you gain a comprehensive view of the information or knowledge available on a topic
